Wrote file afiedt.buf
```

A screenshot of a Notepad window titled 'afiedt.buf - Notepad'. The window contains the same PL/SQL code as the terminal on the left. The code is a PL/SQL anonymous block with a declaration section, an execution section, and an exception section. The exception section handles the 'ZERO_DIVIDE' error. The status bar at the bottom of the Notepad window shows 'Ln 7, Col 33', '100%', 'Windows (CRLF)', and 'UTF-8'.

```
afiedt.buf - Notepad
File Edit Format View Help
DECLARE

Name of student: Saidul
Grade of the student: A
```

PL/SQL Functions

--General Syntax for writing functions

```
CREATE [OR REPLACE] FUNCTION function_name (parameter_list)
    RETURN return_type
IS
```

```
/*Declaration Section*/
```

```
BEGIN
```

```
/*Execution Section (Function body)*/
```

```
--Exception Section (Optional)
```

```
END
```

```
/
```

--General Syntax for deleting or dropping functions

```
DROP FUNCTION function_name;
```

PL/SQL Functions

```
CREATE OR REPLACE FUNCTION get_total_sales (in_date DATE)
RETURN NUMBER
IS

total_sales NUMBER(10,3) := 0;

BEGIN

    -- get total sales
    SELECT SUM(Quantity * PPU)
    INTO total_sales
    FROM Orders, Order_Items
    WHERE Orders.Order_ID = Order_Items.Order_ID AND Order_Date = in_date;

    -- return the total sales
    RETURN total_sales;

END;
/

--Calling the function from an anonymous block
BEGIN
DBMS_OUTPUT.PUT_LINE(get_total_sales(to_date('15_07_2020','dd__mm_yyyy')));
END;
/

--Calling the function in an SQL statement
SELECT get_total_sales(to_date('15_07_2020','dd__mm_yyyy')) FROM dual;
```

Orders

Order_ID	Client_ID	Order_Date
1	23	22-JUN-20
2	32	15-JUL-20
3	43	15-JUL-20

Order_Items

Order_ID	Name	Quantity	PPU
1	Bananas	6	9
2	Apples	10	5.5
2	Oranges	15	5
3	Coffee	50	6.5

Obj: Write a function that takes a date as parameter and returns the total money earned in sales on that date.
(10*5.5 + 15*5 + 50*6.5 = 455)

Function Demonstration

```
SQL> CREATE OR REPLACE FUNCTION get_total_sales (in_date DATE)
2  RETURN NUMBER
3  IS
4
5  total_sales NUMBER(10,3) := 0;
6
7  BEGIN
8
9      -- get total sales
10
11      SELECT SUM(Quantity * PPU)
12      INTO total_sales
13      FROM Orders, Order_Items
14      WHERE Orders.Order_ID = Order_Items.Order_ID AND Order_Date = in_date;
15
16      -- return the total sales
17
18      RETURN total_sales;
19
20  END;
21  /
```

Function created.

```
SQL> BEGIN
2  DBMS_OUTPUT.PUT_LINE(get_total_sales(to_date('15_07_2020','dd__mm_yyyy')));
3  END;
4  /
455
```

Thank You!
